# Your Optica Membership Card

SEE YOURSELF IN OPTICA

**OPTICA** | Formerly **OSA**  
Advancing Optics and Photonics Worldwide

Dear Mr. Yongsong Huang,

Thank you for extending your Optica membership. Gathering thought leaders from around the globe is a principal purpose of our association, and your participation helps us achieve this goal. Through the collective efforts of our community, Optica disseminates knowledge and supports those who make optics and photonics one of the most important intersection points across scientific, engineering, and industrial disciplines.

Optica members reside in more than 180 countries. Their varied interests, careers, and contributions to the field have helped us reach new levels of diversity and breadth. And our portfolio of benefits and activities helps assure that Optica welcomes and serves everyone with an interest in optics and photonics.

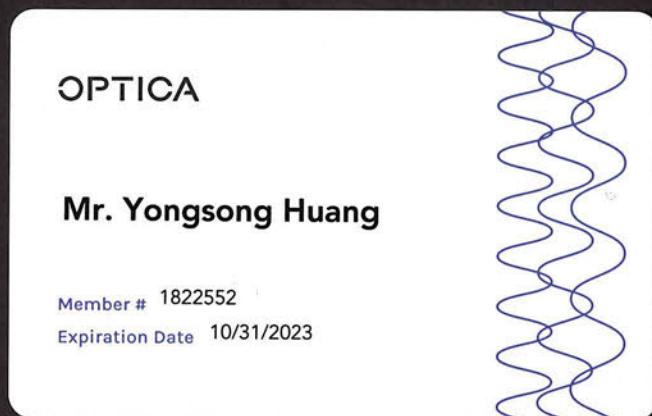

Your membership benefits can be customized to match your interests, and include access to the field's leading peer-reviewed journals and conference papers along with substantial discounts for technical meetings and conferences. The Technical Group affiliations you select provide direct connections with focused information and networking communities. Career resources, including Optica Career Calibrator, and WorkInOptics.com are valuable tools for employers and job seekers.

I look forward to serving as your Optica President and to working with you to advance our field and support our outstanding community.

With best regards,

Satoshi Kawata  
2022 Optica President

## SEE YOURSELF IN OPTICA

### CONNECT

Tap into a global network of more than 22,000+ members, 432,000+ affiliated optics and photonics professionals, and more than 290 companies. Search the member directory, join up to five technical groups, attend meetings and conferences, or volunteer for leadership roles on committees.

### DISCOVER

Stay up to date with access to the largest collection of peer-reviewed optics and photonics content via the Optica Publishing Group platform (400,000+ articles) which includes subscriptions to Optics & Photonics News and Physics Today, exclusive presentations from influential science and industry leaders, and papers from 800+ meetings.

### ADVANCE

Accelerate your career with member-eligible grants, awards, and fellowships along with substantial discounts on high-impact journals. Access our exclusive career training platform, Optica Career Calibrator, post resumes on WORKinOPTICS.com and the Physics Today Career Network. Synchronize your email address with a complimentary optica.member.org email address to seamlessly communicate across organizations and institutions.
